Program Objectives

1. Integrate into daily practice evidence-based recommendations on new and emerging therapies for common dermatologic diseases.
2. Implement updated strategies for managing acne, rosacea, and actinic keratosis.
3. Explain the roles of currently available biologic agents in the treatment of psoriasis and psoriatic arthritis, and appropriately incorporate newer biologics into therapeutic practice as these become available.
4. Describe the mechanisms of action, efficacy, and safety of the biologic agents used to treat psoriasis, as well as the factors involved in appropriate patient selection.
5. Assess patients for comorbidities and manage psoriasis as well as associated comorbidities.
6. Analyze treatment approaches for the pediatric patient with common as well as complex skin diseases.
7. Incorporate the recent research advances in understanding and treating pediatric dermatology issues such as atopic dermatitis and pediatric acne.
8. Discuss new approaches to therapy including pathway targeted therapy in the treatment of melanoma.
9. Incorporate into clinical practice one or more of the targeted treatments that act on the Hedgehog pathway in the treatment of basal cell carcinoma.
10. Assess the role of diagnostic tools and technology in diagnosis and detection of skin cancers.
11. Recognize the factors that are important in selecting appropriate filler agents for treating different areas of the face and targeted planar depths.
12. Compare and contrast the efficacy and safety of agents, devices, and techniques currently available in aesthetic and procedural dermatology.
13. Determine the appropriate nonsurgical techniques for facial rejuvenation based on an enhanced understanding of facial anatomy.
14. Implement communication and reputation management strategies for the use of social media, improving your office-based practice of medicine.
15. Examine energy-based technology for body contouring and discuss appropriate patient selection criteria for utilizing these devices.
16. Evaluate the role of dermoscopy in clinical practice and demonstrate enhanced skill in using this technique to diagnose dermatologic disorders.
17. Discuss the latest recommendations for patch testing and explain how these updated guidelines should be used to improve the treatment of allergic conditions.
18. Compare and contrast the efficacy and safety of agents, devices, and techniques currently available in aesthetic and procedural dermatology.

Legend

 **percent question responses**
 Proportion of a specific response (Qa) to the sum of all responses provided for that question (Qt).
 $percent\ of\ total\ question\ responses = Qa / Qt$
 (Example: X% of all responses to question Y were "A".)

[†] Percentages are calculated in three different ways. Click on the "Show Extended View" option at the top of the report to display the additional calculations. In cases where a question is required and only one response is allowed, all three percentages will be equal. The difference between the three calculations is most notable in a choose-all-that-apply question type that is optional.

Legend

percent question responses
 Proportion of a specific response (Qa) to the sum of all responses provided for that question (Q0).
 $\text{percent of total question responses} = Qa / Q0$
 (Example: X% of all responses to question Y were "A".)

† Percentages are calculated in three different ways. Click on the "Show Extended View" option at the top of the report to display the additional calculations. In cases where a question is required and only one response is allowed, all three percentages will be equal. The difference between the three calculations is most notable in a choose-all-that-apply question type that is optional.

1.	Abbott, Cynthia Dermatology Affiliates	1250249-34oywC 2014-03-01 20:20:19.887-05	cynthia@atlantaskin.com Phone: 6784622917 Fax:	675 Greystone Park NE Atlanta, GA, 30324 USA		there were no poor speakers. An improvement to the program would be to number the pages in the booklet so the speaker could reference where it is. Sometimes I missed significant info bc I was looking. I realize it is submitted a year in advance, all the more reason to number, so changes can be discussed and found at beginning of talk.

I was expecting a workshop, instead, they were additional lectures. The first hour of the dermoscopy session could have been better used as reviewing the basics. The second half was helpful, but very similar to the dermoscopy lecture that was free. I would not have paid for the two extra sessions in the future.

Hayden, ID, 83835 USA	since I work at a community health center, in family practice, there was really not alot of info that was applicable to my situation. I did not look at the course content before I registered. Probably was not the best conference choice. Was hoping for more "dermatology for family practice". Which was my fault. Most of the pts I see do not have insurance so it is difficult to find the funds to get them to rheumatology or dermatology. I also found the lecture on what to do with an unhappy pt very helpful. Will use those ideas and recommendations.

24.	Hall, Michele MSKCC	1249165-Cj28b 2014-02-27 10:24:13.563-05	linchele2000@aol.com Phone: 347768-0477 Fax:	1067 East 73rd St. Apt#3 Brooklyn, NY, 11234 USA		I felt all the speakers were engaging and very well prepared.
25.	Hardy, Diana Marquette General Hosp	1247805-2KVINS 2014-02-24 15:28:42.833-05	diana.hardy@mghs.org Phone: 509594-0970 Fax:	1106 Minneapolis Ave Gladstone, MI, 49837 USA		Some speakers did talk fast, however it was good information. Everyone's ability varies but nice to have lecture notes. I found it comical that one of the latter lectures on how bad the sun is and tanning, and we are having the conference in Hawaii. Overall very good speakers with nice personalities and dynamic, no huge complaints.

Friedlander- This speaker had interesting information, but he talked too fast and mumbled so I didn't understand most of what he said. Also did not have any notes. Stratman- I was looking forward to his talk because I think practice gaps are excellent topics, but he did not get through even 1/4 of his material. Unmarked- did not attend lectures

As one of the participants of this educational activity, we want to encourage you to implement those ideas that were appropriate to your healthcare environment. We look forward to seeing you at future University of Louisville events. Thank you very much.

Legend

 **percent question responses**
Proportion of a specific response (Qa) to the sum of all responses provided for that question (Qt).
 $percent\ of\ total\ question\ responses = Qa / Qt$
(Example: X% of all responses to question Y were "A".)

[†] Percentages are calculated in three different ways. Click on the "Show Extended View" option at the top of the report to display the additional calculations. In cases where a question is required and only one response is allowed, all three percentages will be equal. The difference between the three calculations is most notable in a choose-all-that-apply question type that is optional.

Butherus Drive Scottsdale, AZ, 85255 USA		Some of the talks were a bit slanted toward one product (Belotero esp.) but I appreciated this as is helpful when learning what product to select for fine superficial lines vs. mid-depth vs. deep vs. periosteal. I like to know what products the experts are recommending... It helps me learn. Thank you.

You should limit each speaker to, say, 6 which are impactful. 2) Reading slides does not constitute a professional presentation, no matter how eminent the speaker. 3) No one, again regardless of eminence, should be allowed to make a presentation unless they have had at least a rudimentary public speaking course.
