**Legend****percent question responses**

Proportion of a specific response (Qa) to the sum of all responses provided for that question (Qt).

*percent of total question responses = Qa / Qt*

(Example: X% of all responses to question Y were "A".)

† Percentages are calculated in three different ways. Click on the "Show Extended View" option at the top of the report to display the additional calculations. In cases where a question is required and only one response is allowed, all three percentages will be equal. The difference between the three calculations is most notable in a choose-all-that-apply question type that is optional.

**This activity was created to address the professional gaps listed below:**

- Clinicians are not trained on the new treatments and approaches to common dermatologic diseases.
- Clinicians have not been educated on new evidence for emerging theories on the pathophysiologies of various types of psoriasis, including treatment plans for appropriate patient selection, screening, and protocols for identifying comrbid conditions.
- Clinicians are not educated on identifying and prescribing newer biologics for complex dermatologic disorders.
- Learners are not up to date on the benefits of emerging treatments such as retinoids, antibiotic/immunomodulatory agents, combination agents, and laser/light techniques for acne and rosacea.
- The alarming prevalence of melanoma indicates dermatologists and other clinicians are not recognizing and treating this condition early enough.
- Dermatologists are not trained on the benefits and limitations of surgical and nonsurgical techniques as well as topical treatment options for aesthetic dermatology.

**Question 1.**

Please respond regarding how much you agree or disagree that the gaps listed were addressed.

**Legend**

**percent question responses**  
Proportion of a specific response (Qa) to the sum of all responses provided for that question (Qt).  
*percent of total question responses = Qa / Qt*  
(Example: X% of all responses to question Y were "A".)

† Percentages are calculated in three different ways. Click on the "Show Extended View" option at the top of the report to display the additional calculations. In cases where a question is required and only one response is allowed, all three percentages will be equal. The difference between the three calculations is most notable in a choose-all-that-apply question type that is optional.
