Legend
percent question responses Proportion of a specific response (*Qa*) to the sum of all responses provided for that question (*Qt*). *percent of total question responses = Qa / Qt* (Example: X% of all responses to question Y were "A".) † Percentages are calculated in three different ways. Click on the "Show Extended View" option at the top of the report to display the additional calculations. In cases where a question is required and only one response is allowed, all three percentages will be equal. The difference between the three calculations is most notable in a choose-all-that-apply question type that is optional.
