------------------------	---

Legend**percent question responses**

Proportion of a specific response (Qa) to the sum of all responses provided for that question (Qt).

percent of total question responses = Qa / Qt

(Example: X% of all responses to question Y were "A".)

† Percentages are calculated in three different ways. Click on the "Show Extended View" option at the top of the report to display the additional calculations. In cases where a question is required and only one response is allowed, all three percentages will be equal. The difference between the three calculations is most notable in a choose-all-that-apply question type that is optional.

I feel we need much more family therapy in our practice and need to make inroads into helping parents and other caregivers understand their role in their child's behavioral outcomes. Many are in denial and think medications should "fix" their

					<p>child. I feel like we really need to start focusing on this issue especially since inpatient stays are shortening due to managed care restrictions and changes. Also, just a bynote, that the symposium brochure stated nurses would get 7.5 CEU's but when completing the CEU documentation on line, the maximum allowed CEU credit was 6.9? Can someone please look into this? Thanks!</p>
