Total Completed: 14

Options: Show Extended View

This activity was created to address the professional practice gaps listed below:

- Recognizing drugs as a cause of skin diseases. Clinicians are unaware of the conditions that might be caused by drugs.
- Assessing drug-drug interactions which can result in ineffectiveness of a drug or can result in drug related toxicity.

1. Please respond regarding how much you agree or disagree that the gaps listed above were met.

Participating in this educational activity changed your KNOWLEDGE in the professional practice gaps listed above.  
(1=Disagree,5=Agree)

| Sample                  | Mean      | Graph   | Std. Dev. |
|-------------------------|-----------|---|-----------|

Could you make it a little more educational and less punitive for those of us in private practice? I have passed my boards 3 times now and I can do a mean KOH and I know pubic lice when I see it but I seem to fall a point or two short on that test every year. |
