[Respondent Details](#) [Trend Analysis](#)

2. If this activity improved your competence, please tell us how.

Response	Count	Graph	Percent <sup>†</sup>
Open-ended Text Responses (View Responses)	21		100%
Non-Responders:	13		

3. If this activity improved your performance, please tell us how.

Response	Count	Graph	Percent <sup>†</sup>
Open-ended Text Responses (View Responses)	18		100%
Non-Responders:	16		

4. Discuss how your Patient Outcomes (omit patient names) have improved as a result of attending this activity.

Response	Count	Graph	Percent <sup>†</sup>
Open-ended Text Responses (View Responses)	18		100%
Non-Responders:	16		

5. Identify practice changes you have made as a result of attending this activity.

Response	Count	Graph	Percent <sup>†</sup>
Open-ended Text Responses (View Responses)	16		100%
Non-Responders:	18		

6. What topics do you want to hear more about, and what issue(s) in your practice will this help address?

Response	Count	Graph	Percent <sup>†</sup>
Open-ended Text Responses (View Responses)	13		100%
Non-Responders:	21		

**Legend**

**percent question responses**  
 Proportion of a specific response (Qa) to the sum of all responses provided for that question (Qt).  
 $percent\ of\ total\ question\ responses = Qa / Qt$   
 (Example: X% of all responses to question Y were "A".)

<sup>†</sup> Percentages are calculated in three different ways. Click on the "Show Extended View" option at the top of the report to display the additional calculations. In cases where a question is required and only one response is allowed, all three percentages will be equal. The difference between the three calculations is most notable in a choose-all-that-apply question type that is optional.
