

Seminars in Anatomical Sciences & Neurobiology

Thursdays 4:00PM - 5:00PM, Roisen conference room, Rm 501 Tower A

September 14

William Guido, PhD
Department Chair, ASNB
University of Louisville

These times they are a changin'

September 21

Rafael Demarco, PhD
Associate Professor,
Dept. of Biology
University of Louisville

Metabolic Regulation of the Germline Stemcell Niche in Drosophila

September 28

Dan O'Connor, PhD
Professor,
Dept. of Neuroscience
Johns Hopkins University

Exploring the Sensorimotor control of the mouse tongue and jaw

October 5

Seth Blackshaw, PhD
Professor, Depts. of
Neuroscience, Neurology
& Ophthalmology
Johns Hopkins University

TBA

October 12

Ed Callaway, PhD
Professor
Chair in Molecular
Neurobiology
Salk Institute
Organization and function of cortico-thalamo-cortical interactions in the mouse visual system

October 19

James Dooley, PhD
Assistant Professor, Dept.
of Biological Studies
Purdue University
Sleep like a baby (rat): How movements during sleep teach the brains of infant rats how their bodies move

October 26

Christin Godale, PhD
Director, Life Sciences
Cincy Tech
From Scientist to Investor: Bridging Academia and Venture Capital in Science Commercialization

November 2

Roberto Vincis, PhD
Assistant Professor, Dept.
of Biological Sciences
Florida State University
Neural activity underlying intraoral sensory processing and flavor perception

November 9 &
November 16

SfN

November 23

Thanksgiving
No Seminar

November 30

Farran Briggs, PhD
Associate Professor, Depts. of
Neuroscience and Brain &
Cognitive Sciences
University of Rochester
The functional role of corticogeniculate feedback in vision

December 7

Gene Holt, PhD
Associate Professor,
Dept. of Ophthalmology
Wayne State
TBA
