

# **James B. Longley Seminar Series**

## **Hosted by Anatomical Sciences & Neurobiology**

Thursdays 4:00PM - 5:00PM, Roisen Conference Room, Rm 501 Tower A

Semester - Fall 2024

September 12

**Andrea Tedeschi PhD**  
Assistant Professor,  
Ohio State University

*Maladaptive sensory plasticity  
disrupts adipose tissue  
homeostasis after spinal cord  
injury*

September 19

**Bryan Shaw, PhD**  
Professor,  
Baylor University

*DOVS faculty candidate*

*\*Location and time change*

*Making Science Accessible to  
People with Blindness and  
Low Vision*

October 3 & 10

**No Seminar - Society for  
Neuroscience Annual  
Meeting**

October 17

**Maureen McCall, PhD**  
Professor,  
University of Louisville

*Genetic strategies to treat of  
cure inherited retinal disease*

October 24

**Nazratan Naeem**  
ASNBS graduate student  
University of Louisville

*Ultrastructure and synaptic  
properties of projections to  
the centrolateral nucleus of  
the thalamus (CL) originating  
from Pitx2 neurons of the  
superior colliculus*

November 7

**Bart Borghuis, PhD**  
Associate Professor,  
University of Louisville

*How retinal bipolar cells  
encode visual information*

November 14

**Leah Krubitzer, PhD**  
Professor,  
University of California, Davis

*Details to come*

November 21

**Jonathan Horton PhD**  
Professor,  
University of California, San  
Francisco

*Alternating Exotropia:  
Physiology and Perception*
