

Seminars in Anatomical Sciences & Neurobiology

Thursdays 4:00-5:00 PM

September 15

William Guido, PhD

Dept. of Anatomical Sciences
and Neurobiology
University of Louisville

*State of ASNB: Emerging
from the Covid Cave*

September 22 (virtual)

Dori Shafer, PhD

Associate Professor
Dept. of Neurobiology
UMass – Chan Medical School

*Should I stay or should I go:
Microglia-astrocyte
crosstalk during synapse
pruning.*

September 29

Phyllis Robinson, PhD

Professor
Dept. of Biological Sciences
University of Maryland –
Baltimore County

*Melanopsin from molecule
to behavior*

October 6 (virtual)

Tom Reh, PhD

Professor
Dept. of Biological Structure
University of Washington –
Institute of Stem Cell and
Regenerative Medicine

*Reprogramming glia to
regenerate neurons in the
retina: it's never too late
to change their fate.*

October 27

Hammam AIMakadma, PhD

Assistant Professor
Dept. of Audiology
University of Louisville – School of
Medicine

*Advanced Measures of the
Middle Ear Function:
Physiological and Clinical
Assessments'*

November 3

Shernaz Bamji, PhD

Professor
Dept. of Cellular &
Physiological Sciences
University of British
Columbia

*Role of palmitoylation in
brain development and
disease*

November 10

*Society for Neuroscience
2022 meeting*

November 17

*Society for Neuroscience
2022 meeting*

November 24

Fall Break

December 8

Sandra Garraway, PhD

Associate Professor
Dept. of Cell Biology
Emory University – School of
Medicine

*Examining peripheral
contributions to
nociceptive plasticity and
pain after Spinal cord
injury*
