

# Free CME Credit Available

“All Hazards” Medical Training for Mass Casualty Events

As a member of the National Disaster Life Support Foundation, Inc, the University of Louisville Department of Emergency Medicine Division of Protective Medicine is offering free CME Credit for the eCDLS™.

The eCDLS™ course is the on-line version of Core Disaster Life Support® (CDLS®). Recognizing that many potential students of CDLS® are unable to arrange for attendance at a live course, CDLS® has been made available for distance learning. The added advantage of the on-line approach is that the student may take the course in multiple sessions over a period of several days or weeks; it is self paced. This course was developed by the AMA under a grant received from the US Department of Homeland Security.

Visit <http://www.ncbrt.lsu.edu/elearn> to access the course at no charge. Those who complete the course by September 30, 2009, will receive a course completion certificate, a Core Disaster Life Support course manual, wallet card and the *AMA Management of Public Health Emergencies* virtual library on CD-ROM. If you have trouble accessing the course, contact [elearn@ncbrt.lsu.edu](mailto:elearn@ncbrt.lsu.edu).

Please contact [jaimeshipley@louisville.edu](mailto:jaimeshipley@louisville.edu) or (502) 852-6599 for more information about the eCDLS or other courses that are currently being offered at the Center for Disaster Medicine Preparedness.

The American Medical Association is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The American Medical Association designates this educational activity for a maximum of 4.0 AMA PRA Category 1 Credits. Physicians should only claim credit commensurate with the extent of their participation in the activity.
