

Welcome to the University of Louisville Geriatric Medicine Fellowship Program. Thank you for your interest in the fellowship program. Our program is housed in the Department of Family and Geriatric Medicine and is closely affiliated with the University of Louisville Institute on Optimal Aging. We are accredited by the Accreditation Council for Graduate Medical Education for this one year post-graduate education program for physicians who have completed a residency in Family Medicine or Internal Medicine.

Fellows are exposed to a variety of clinical environments, including University of Louisville Hospital, Jewish Hospital, Frazier Rehab Institute, and the VA Medical Center. To prepare fellows for a wide range of career opportunities, fellows train in various clinical settings, including acute care, subacute rehab, long term care, outpatient clinic, and home care. As members of an interdisciplinary team, fellows gain experience in managing complex patients, leading a team, and providing comprehensive geriatric care.

Our goal is to train physicians to be geriatricians, community leaders, and innovators in change. Our graduates have taken career positions in many areas: academic geriatricians, private practice geriatricians, VA geriatricians, as well as primary care physicians and subspecialists with board certification/certificate of added qualifications in geriatrics.

Please check out our program. If you have any questions, please contact us at (502) 852-1806 or by email aaron.vowels@louisville.edu or lmort02@louisville.edu.

Sincerely,

Laura Morton, MD, CMD
Director Geriatric Fellowship
