We say Goodbye to our current Senior Residents: Meagan Heulsman, MD and Virginia Kartha, MD and our Current Micrographic Surgery and Cutaneous Oncology Fellow: Ryan Bogner, MD

Ryan will be leaving Louisville to enter practice in his home state of North Dakota. However, both Meagan and Virginia will remain in Louisville and join our clinical faculty.

KUDOs to....

Dr. Jeffrey Callen was awarded the Lifetime Career Educator Award by the Dermatology Foundation at their annual meeting in Washington, DC, March 2019.

Dr. Mark Jackson was elected to a two-year term as the President of the American Acne and Rosacea Society

Dr. Courtney Schadt is the chair of the Program Committee for the upcoming meeting of the Association of Professors of Dermatology. Chicago, IL September 13-14, 2019

A Tribute to Michael W. McCall, MD

Since our last newsletter, Dr. McCall passed away. Mike was the first Mohs Surgeon in Kentucky, having trained with the famous Dr. Mohs in the early 1980s. Mike had a passion for his work and loved his ability to train others in the technique. He created the Mohs Fellowship program and trained more than 20 physicians who practice in all areas of the US.

His teaching impacted the lives of our residents and his infectious laugh could be heard throughout the clinic.

He was a leader having served as President of his High School Class, President of the Kentucky Dermatology Society and President of the Greater Louisville Medical Society.

His family's wishes for donations in his memory included Dr. Robert Friedlander's Alzheimer's Research Fund or the Broadway Baptist Church.

WINTER SKIN SEMINAR 2020

The venue is the Canyons in Park City, Utah. The hotel will be able to take your reservations shortly, but space in the hotel is limited, so make your plans early.

The organizing committee consists of Jeffrey P. Callen, Soon Bahrami, Carol Kulp-Shorten and Cindy E. Owen.

The seminar begins during the first weekend of the Sundance Film Festival, and thus if you have an interest in films you might be able to get tickets, but if you love skiing the slopes are more open during the festival. The Canyons is now connected with Park City Mountain Resort providing 7300 skiable acres.

20.25 hours of AMA PRA category 1 CME credit.

The website will be available shortly.

OUR ENDOWMENT FUNDS

We have five endowment funds which support our mission to educate students and residents .

1. The **Dermatology and Dermatopathology Endowment Fund** - This fund was originated by Dr. LG Owen for the purpose of support for Faculty and/or Fellows. The contributed funds predominated from Dr. Owen and his colleagues in Dermatopathology over the years including Drs. Fabre, Malone, Bahrami, Hood and Farmer, but all faculty who staff clinics without pay have helped to raise funds for this endowment.
2. The **Bernice Fine Memorial Lectureship in Cutaneous Medicine** - This fund began when Lew Fine, MD left money in his will to support a yearly lectureship.
3. The **Jeffrey P. Callen, MD Lectureship fund** - We now have pledges of \$269,025.00 and have collected \$262,775.00.
4. **Dermatology Resident Education Fund**—We will face limited resources in the future and wish to develop a fund the support the costs associated with resident travel and education. This fund has cash and pledges of \$156,167.19 at present, but our goal is \$400,000.00.
5. **Drs. James and Vickie Turner Dermatology Lectureship Fund**— this is a new fund that is fully funded through a generous gift from the Drs. Turner.

CHALLENGING CASE FOR DIAGNOSIS— ANSWER FROM THE FALL 2018 NEWSLETTER

This patient presented with a painful erosive lesion on the anterior leg that had been present to two years. She had been seeing Wound Care without response.

What is the best diagnosis?

1. Sarcoidosis
2. Pyoderma Gangrenosum
3. **Necrobiosis lipoidica**
4. Granuloma annulare
5. Granulomatous polyangiitis

CHALLENGING CASE (ANSWER IN THE SPRING 2019 NEWSLETTER)

This 54-year-old woman with a history of discoid lupus erythematosus developed the pictured changes on the posterior thighs within the past month. She was asymptomatic.

What is the best diagnosis?

1. Cutaneous polyarteritis
2. Erythema ab igne
3. Anti-phospholipid antibody syndrome
4. Cryoglobulinemia
5. Topical steroid overuse
