

# **University of Louisville Department of Pathology**

## **MENTORSHIP PROGRAM**

Each PGY1 resident is paired with a faculty mentor at the beginning of the academic year. Faculty mentors are chosen based on the PGY1 residents' career interests. The role of the faculty mentor is to provide career guidance through regular meetings with mentees (at least twice per year). If a resident's interests and professional goals change during the course of residency, the resident has the option of changing their faculty mentor.
