

#Healthyatwork

Phased Re-opening of the
residency program

All phases

- Universal masking
- PPE conservation
- Social distancing...as much as possible
- Will be flexible
 - Dependent on patient volume
 - Occasional personal restrictions

Phase 1

- Starts May 4
- Return to core subspecialty elective rotations
 - Inpatient consults
 - Outpatient clinic
 - Telemedicine
- Longitudinal clinics with gradual increases in patient visits
- Non-core electives remain on self-study
- Conferences remain virtual

Phase 2

- All of phase 1 plus
- Return to non-core electives as long as appropriate distancing and PPE can be provided to trainees
- Trial of smaller in-person educational conferences
- Large conferences remain virtual

Phase 3

- All of Phase 2 plus
- Full participation in longitudinal clinics
- Noon conference and Morning Report in-person
- Simulations resume in person
- Large conferences remain virtual

Phase 4

- All of Phase 3 plus
- All conferences return to in-person

Barriers

- Balancing social distance with availability/location computers
- Learners with telemedicine is still clunky
- Dependent on patient volume
- Some residents with restrictions based on medical conditions and pregnancy
