

Microsoft Virtual Desktop

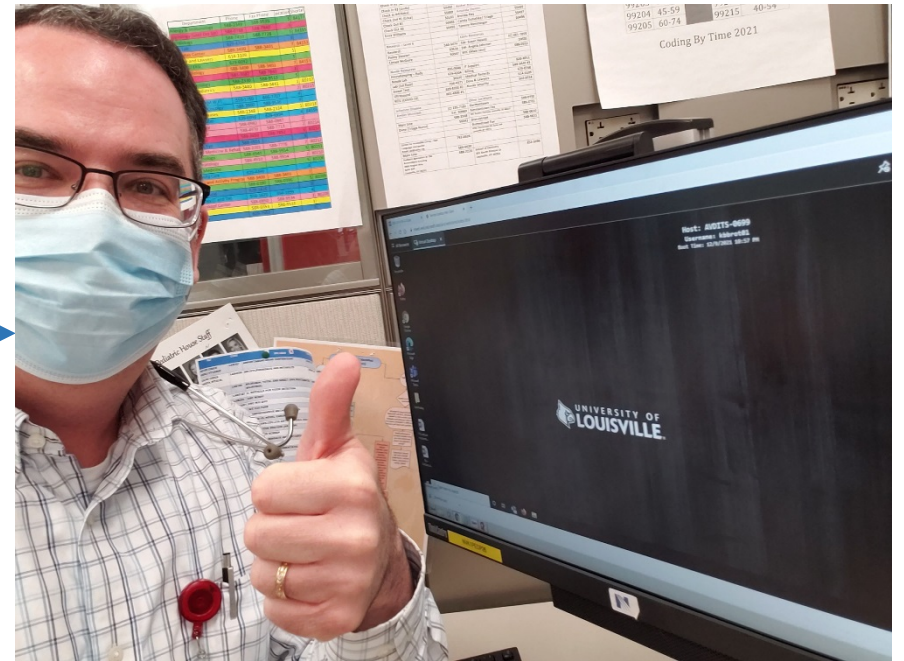

or

How to do academic work when you are in clinic

Microsoft Server
in a data center somewhere

You in Clinic

Virtual Desktop Includes:

- Windows 10
- A direct connection to the UofL Network
- Microsoft Office Apps
- Microsoft Teams
- Microsoft OneDrive/Sharepoint Client
- 4 Browsers (IE, Edge, Chrome, Firefox)

Virtual Desktop

Disadvantages:

- You cannot install any additional applications

Advantages:

- Is not subject to webpage blocking that Norton implements on their network, even when you access it on their network
- You can install browser extensions (like password managers)

How to do this...

1. Request access by e-mailing kyle.brothers@louisville.edu. Confirmation you have access will take about 1-2 weeks.
2. Follow this link: <https://rdweb.wvd.microsoft.com/arm/webclient>
(This is posted on this Internal Pediatrics Research Resources page so you can link from there.)

Tips, Templates, and Resources

Access Norton Healthcare Research Office

Additional Norton resources are available on the [Norton Healthcare Research Office website](#) when accessed by a Norton Healthcare computer or through NSite.

What Financial Data/Information Norton Healthcare Can Routinely Provide:

Increasingly Clinical Research Sponsors (especially Industry Sponsors) are requesting financial information related to clinical services provided to research participants/patients. Requests from Research Sponsors to date for financially-related clinical services information include; (1) clinical services "charges" data, (2) actual "negotiated reimbursement rates" for clinical services with different payers and (3) actual patient "out of pocket" costs for clinical services.

To facilitate review/processing, NHC requests that UL researchers contact NHC research as soon as a study is submitted that requests financial data. NHC Research will create a simple form for completion. NHC can provide to Research Sponsors, clinical services charges data(#1 above), in the aggregate, or by procedure, for research participants/patients when addressed in the research informed consent/authorization documentation and is part of (assuming the agreement ONLY proposes clinical services "Charges" data) the NHRO agreement with the sponsor/UofL.

A Few Tips

- In clinic, “P” computers work better than “T” computers.
But... both can do this!

P

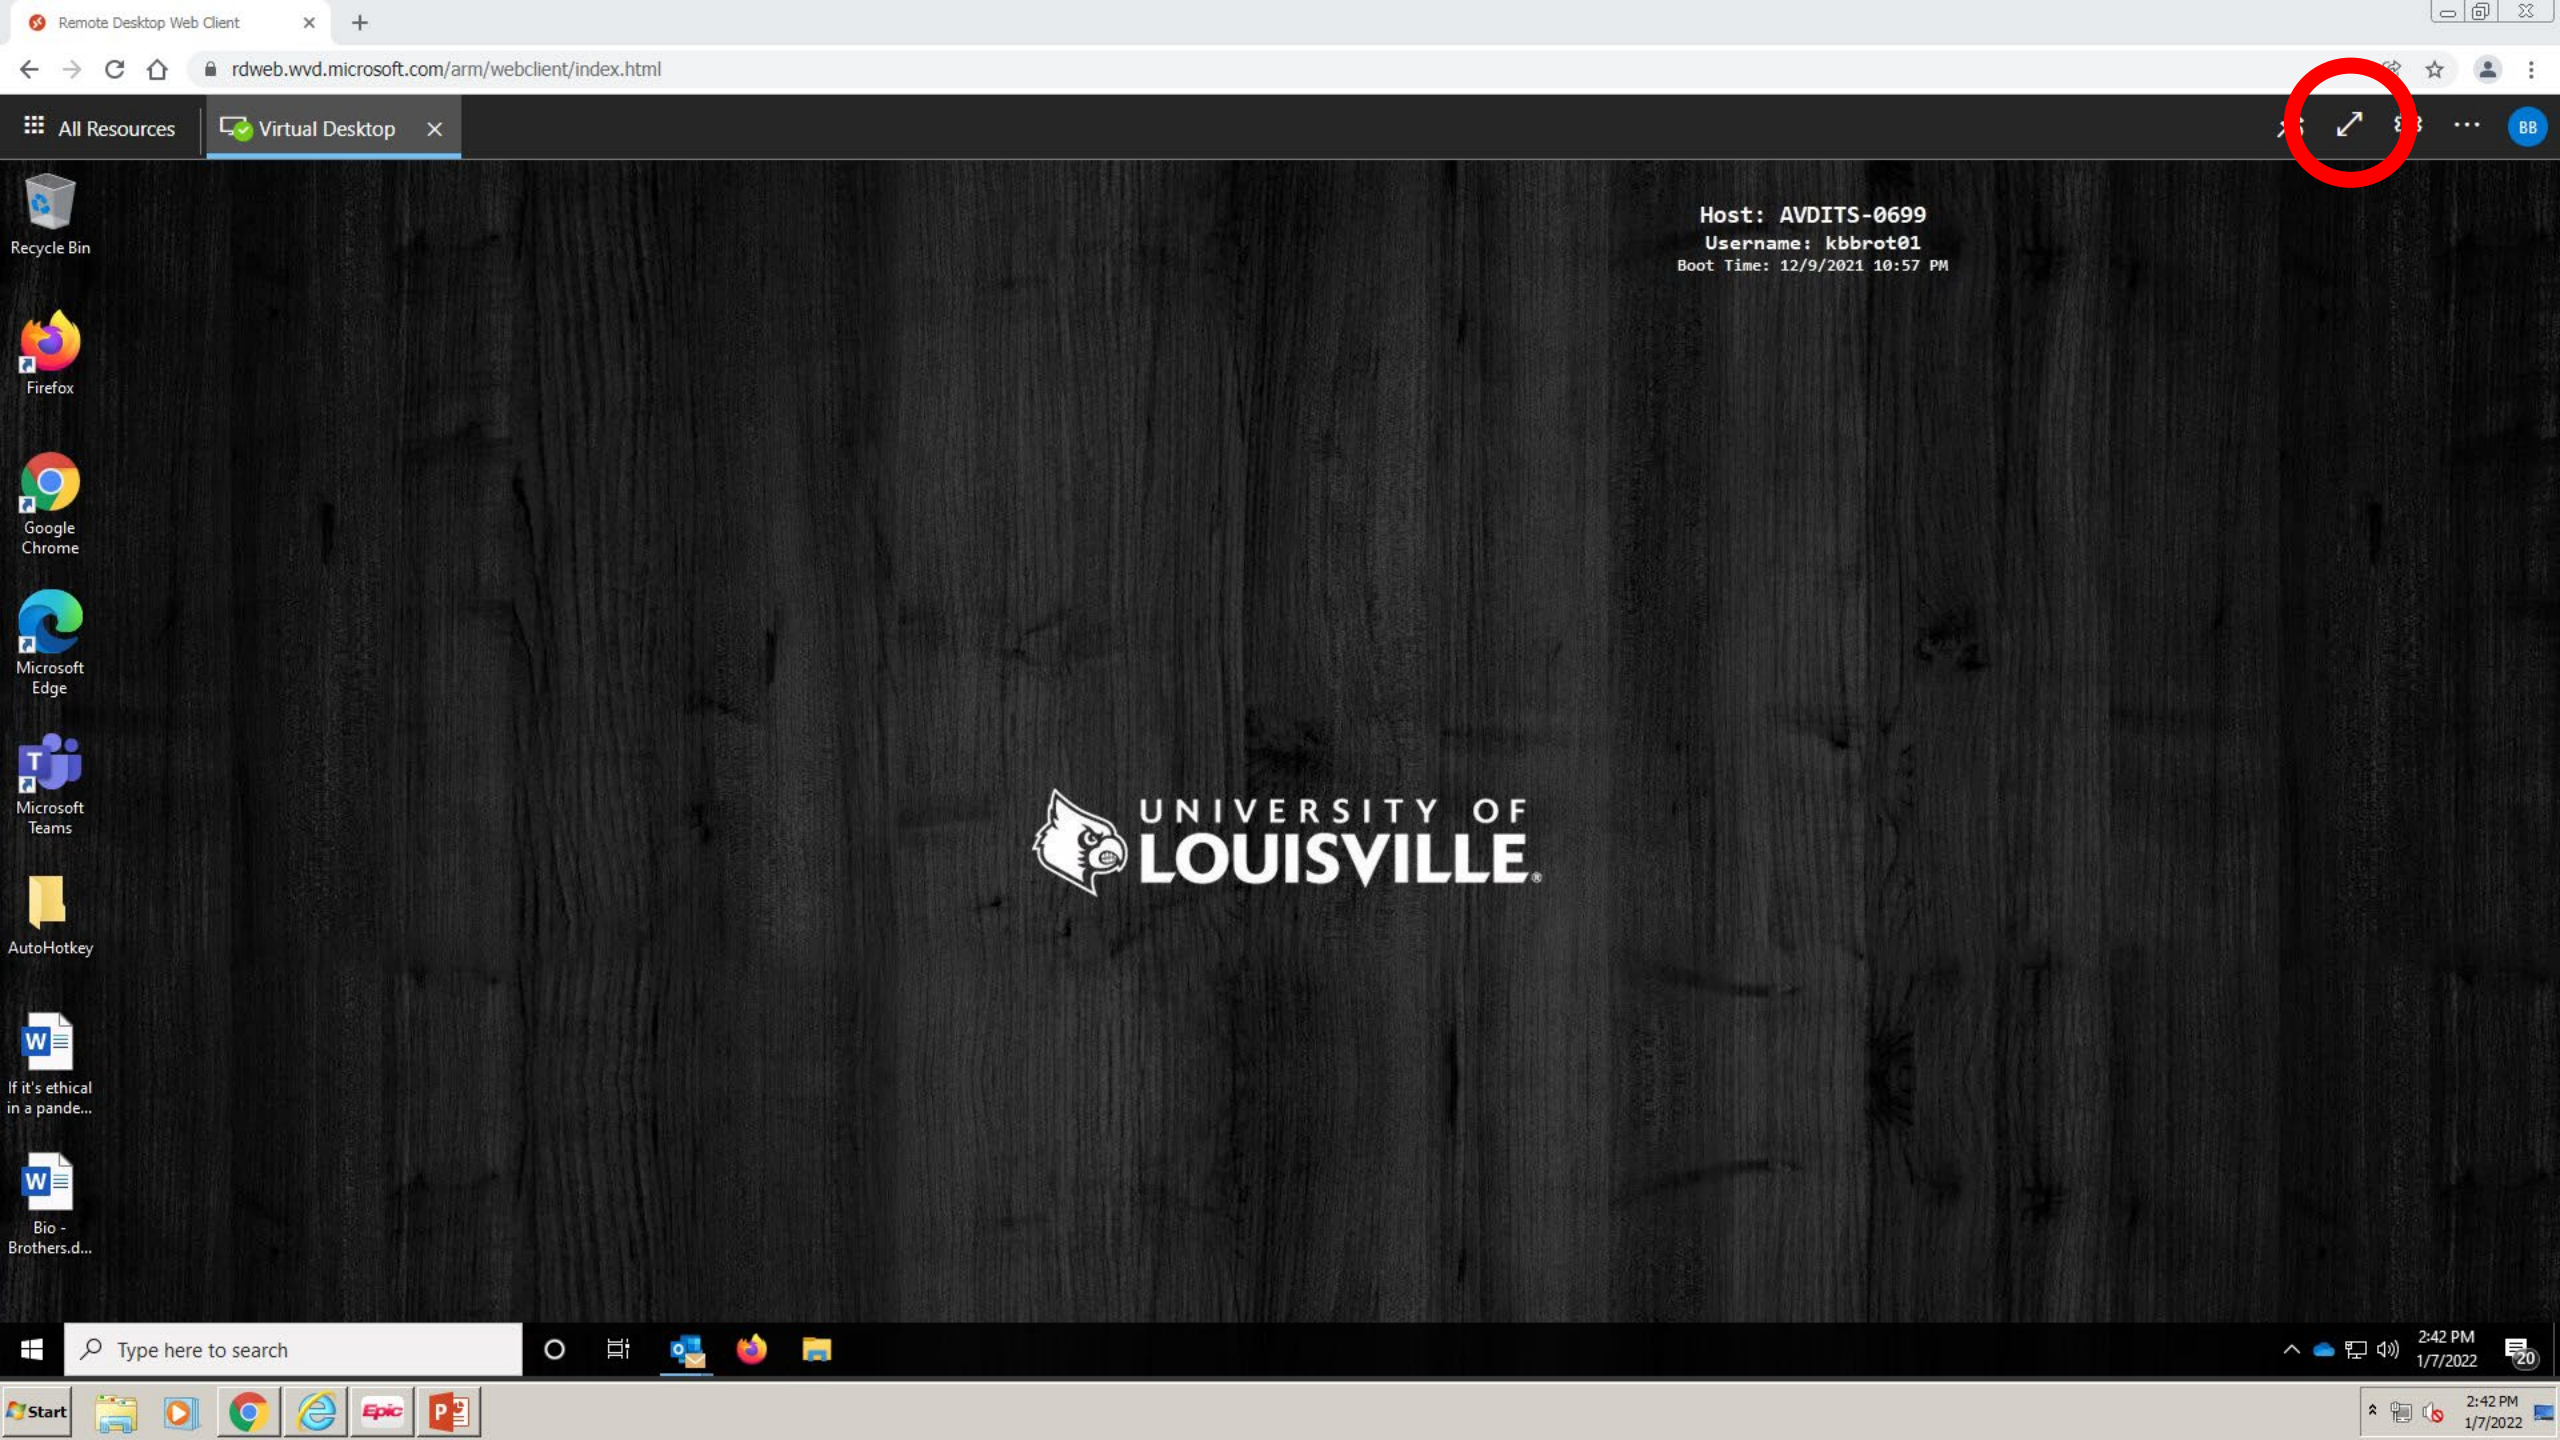

T = Thin Client

A Few Tips

- It can get a little confusing when you have a Windows desktop in a browser... running in another Windows desktop
- Putting the virtual desktop into “Full Screen” mode can help
