

As part of our mission to highlight the great work NCMG APPs continue to provide within the Pediatric Services lines, we offer a glimpse into the scope of APP utilization. Several NCMG service lines are staffed with APPs to provide needed care to our region for current and future predicted growth.

Intensive Care (NICU/PICU/CICU & Heme/Onc)	NICU	PICU	CICU	Heme/Onc
APP Number	43	4	7	8
APP	40	4	7	8
PA	3	0	0	0

3 of the 4 PICU APPs are dual certified in primary and acute care

APPs as Integral Team Members to Support Multi-Disciplinary Clinic Growth:

- Pediatric Metabolic Clinic: Peds Cardiology and Endocrinology Teams
- Ehrlos Danlos Clinic: Peds Orthopedics, Rheumatology, and Gynecology
- Norton Children’s Spina Bifida Clinic: Neurosurgery, Orthopedics, Urology and Gynecology

APPs are positioned to research best practice and can help lead, with physician colleagues, continuing to improve opportunities to serve additional children across the state of Kentucky through the continued creation of evolving care models.

As part of the Office of Advanced Practice (OAP), the NCMG Advance Practice provider team is committed to promoting collaborative, independent practice through structured professional competency to continue to support the goals of the organization and those we serve.
