

April-Pediatric Regional Operations

Written By: Brandy A. Hawkins

In March, I provided an overview of the regional operations for our pediatric “outreach” sites. Starting with Etown, I will provide details for each site in the coming months.

Etown is a location that presents us with a large opportunity for growth based on population growth in that area and the infrastructure created there. Currently, our Etown space has 3 exam rooms and 3 full-time staff members, including an onsite supervisor. We are looking for a larger space or building onto the current space due to the demand for specialties but the barrier of not having adequate space. We share this building with our Etown Gen Peds colleagues. Last month, we expanded access to include more than one specialty in Etown on certain days of the month, and for these days, we use some of the Gen Peds rooms. We have quickly expanded access at this site with multiple specialties while using this model in the interim of finding new space.

I have included the Etown schedule below. Currently, all providers travel to this location. Cardiology does have a full-time APP posted that would be at this site permanently.

◀ April		May 2023					June ▶
Sun	Mon	Tue	Wed	Thu	Fri	Sat	
	1 Cardio	2 Cardio	3 Uro	4 Neuro MFM	5 Gyn	6	
7	8 Cardio	9 Cardio Uro	10 MFM	11 Pulm	12 Uro	13	
14	15 Cardio	16 Cardio	17 Uro	18 Gyn MFM Neuro	19	20	
21	22 Cardio	23 Cardio Uro	24 Gyn MFM	25 Neuro Pulm	26 Uro	27	
28	29 Memorial Day Holiday	30 Cardio	31				

Also, see the visit growth in Etown for the last 2 years!

Note: 2023 data is just for January and February. By year-end, we will be several hundred visits better than last year. Great work!
