# Faculty Shout Outs

by the residents

“Rotating at the Stonestreet clinic is always a pleasure. Things are well organized, you are able to earn the trust of your attendings and the teamwork there is great!”

“Downtown clinic is wonderful and a great place to learn and take care of complex patients and sick patients.

“The ID department has led the way in having collaborative and interactive noon conferences that are based on high quality adult teaching strategies.”

“Cardiology has been my favorite elective of residency. The attendings and Nurse Practitioners were amazing and always willing to teach about complex cardiac patients. The cases were remarkable and even though they were complex learning, the physiology behind them was great.”

“Dr. Currie is a great teacher and very approachable. I have a new found respect for everything that she and Dr. Green and the department do for our program/patients.”

“Heme/Onc has attendings who are passionate about teaching and take the time to really explain things. I feel like I left this rotation with a truly greater understanding of hematologist/oncologist processes.”

“Love Germantown (clinic). The attendings are phenomenal, the RN’s treat residents with respect and are a joy to work with. This clinic clearly operates the most efficiently of any resident clinic and is overall the best experience. Thanks everyone involved!”

“Dr. Battistini is a truly phenomenal clinician and teacher and loves to teach and have residents engaged in clinic. She also does a great job with teaching and leading lectures and going over practice questions.”

“Dr. Shah & Dr. Prasad are wonderful teachers. They both set aside time each day to teach a topic.”

“Everyone in the Endocrinology department is so welcoming and dedicated to teaching. One of the best experiences in residency so far!”

“I really enjoyed my experience while on GI. The attendings I worked with did a great job on teaching from previously curated slides as well as bedside teaching. They did quite well in explaining their thought process on why certain things were ordered vs. others. I was also able to observe numerous scopes all with a variety of findings. Lastly, the patients we encountered were great learning experiences.”

“I loved working with the clinic attending on Ambulatory. The attendings were eager to help me be independent but always available for teaching when I had questions or was unsure.”

“All of the ID attendings are truly wonderful clinical teachers!”

“The Nephrology attendings are incredibly kind and fantastic teachers. They truly care about our education and make the rotation stress free.”

“I enjoyed working with Dr. Havlin on my PICU rotation. I appreciated his calming demeanor, and he always prioritized teaching alongside patient care.”

“All of the attendings and fellows focus on learning in the PICU, even when we are at capacity.”

“The teaching on the NICU rotation is excellent, everyone from nurses to fellows to attendings tries to take time to give pearls of knowledge which is really great. Everyone is so willing to help with all tasks from doing procedures to helping with notes.”

“Dr. Singh, Dr. Crabtree, Dr. Fischer are three of the best attendings I’ve ever worked with in terms of teaching, clinical efficiency, and respect for residents. I really appreciate my time in the NICU.”

“Genetics has a ton of interactive teaching with Dr. Asamoah, often 1-on-1; and then he has quiz questions allowing you to use that knowledge gained to apply it.”

“Dr. Williams, Dr. Multerer, Dr. Voegele, Dr. Schwenk, Dr. Mittel, and Dr. Woomer are a pleasure to work with. They are always very respectful of residents; our time, efforts, and feelings.”

“Dr. Melissa Porter is a wonderful attending and role model. She allows residents to be autonomous, but provides teaching and support as needed to optimize the experience.”

“In the ED/Wards we are given the opportunity to carry out our own plans, perform our own procedures, and really take ownership. This creates a wonderful environment for learning.”

“I appreciated how the cards group allowed residents to tailor the teaching they wanted. Opportunity in the ICU, echo lab, cath lab. There was ample time for teaching by attendings. Greatly appreciated this rotation.”

“The attendings for both cardiology and endocrinology are obviously passionate about what they do and that translates into how they incorporate residents into their work without making residents feel as if we are just there to write notes. They go out of their way to teach about clinically relevant topics and oftentimes are able to do so in a way that is conversational, making for an excellent learning environment.”

“DBP is clearly incredibly focused on education. The work load is never too heavy to stop and read or ask questions.”

“Dr. Schikler with rheumatology always sets aside time to touch on different topics that he felt would be beneficial for the residents.”

“Emergency Medicine is a great rotation for getting to work up problems from scratch. I felt like I grew as a resident by learning to triage patients and get better with initial assessments.”

“I was pretty blow away by the amount of teaching on cardiology, both in the PICU and CICU. All the attendings were really nice and eager to teach about a variety of topics (congenital heart disease, EKG/telemetry, heart failure, etc.) I went in not feeling very confident but by the end of the rotation I had learned so much.”

“Dr. Badal is a fantastic attending physician! She is easy to approach with questions and easily able to break down more complex concepts to allow for universal understanding. She is a constant positive energy, and her acceptance and affirmation when interacting with patients is so inspirational.”

“Dr. Vethody and Dr. McCubbin are great to work with and allowed me to have autonomy in seeing patients and made me feel like a valued member of the team when I was there which I really appreciated!”

# Thank You!
