

DANIELLE DRESNER, MPH

DIRECTOR, PROVIDER OPERATIONS

Allergy, Gastroenterology, Hematology/Oncology,
Infectious Diseases, Nephrology, Ophthalmology,
Pulmonology, Rheumatology

My favorite thing about my job is...

It's a tie: 1) having the opportunity to support providers who do amazing work to care for children every day and 2) my amazing team of providers, managers, and staff.

My hometown is...

I was born in Norfolk, VA but spent most of my childhood in Floyds Knobs, IN. After moving away for undergrad and grad school, I worked in Boston for about 8 years. I returned to Louisville in 2018 when I started dating my now-husband because he (and most of my family!) were here.

My favorite movie is...

I love James Bond films!

My family is...

My husband Duffy and I have been married for almost three years. We have a twenty-month old son, Wesley. We're both from a family of girls; I have two sisters and he has three. We're lucky to call one of my sisters and her husband our neighbors.

Our Pets...

I adopted a dog named Millie two years ago. She's a black lab mix.

I like to travel...

I love to travel the world, though COVID and a toddler have made that difficult recently! My husband and I instead have worked on checking states off the list (I have 17 left!). This summer I am going to France for a wedding, and anywhere in Southeast Asia would be on my dream destinations list.

As a child, I wanted to be...

a doctor, a nurse, an archaeologist, and a hairdresser :) It changed daily.

My first job was...

filing paper medical charts at my dad's office

My favorite dessert is...

Chocolate mousse
