

Welcome to Module 4: Clinical Skills

This module consists of hands-on sessions to familiarize you with important clinical skills that you may need to utilize during your overseas trip. Each trip has different requirements depending on the nature of the work you will be performing. See the list below for the requirements for each trip, and refer to the table for the dates and times that each training session is being offered. Most sessions will take place in the Paris Simulation Center on the 3rd floor of the instructional building, with only Clinical Skills 3 taking place at UL Hospital.

Note: what is listed is what is **REQUIRED** of you. You may choose to attend sessions that are not required to learn and practice the clinical skills if you choose. Please email GEO@louisville.edu with any requests for waivers based on prior clinical skills training. You will receive credit for this module based on attendance.

Please reserve a spot for your training by sending an email with your desired session date and time to: GEO@louisville.edu. A confirmation email will be sent to you for each session you are registered to attend.

Required modules (by trip):

Ecuador: Clinical Skills 1
Brazil: Clinical Skills 1, 2A
