## S. Malia Fullerton, D.Phil

Associate Professor of Bioethics and Humanities University of Washington, School of Medicine.

Stephanie Malia Fullerton, D.Phil, is Associate Professor of Bioethics and Humanities at the University of Washington School of Medicine. She is also Adjunct Associate Professor in the UW Departments of Epidemiology and Genome Sciences, as well as an affiliate investigator with the Public Health Sciences division of the Fred Hutchinson Cancer Research Center. She received a PhD in Human Population Genetics from the University of Oxford and later re-trained in Ethical, Legal, and Social Implications research with a fellowship from the NIH National Human Genome Research

Institute.

Dr. Fullerton's work focuses on the ethical and social implications of genetic and genomic research, biobanking, and clinical genetic testing, including researcher and participant perspectives on data-sharing, secondary use, result return, and clinical implementation. She leads an exploratory research project (R21) focused on patient safety in genome medicine, is co-Investigator on the Community-Based Evaluation of APOL1 Genetic Testing in African Americans study (Young/Burke, PIs), and is affiliated with the UW Center for Genomics and Healthcare Equality, a Center of Excellence in ELSI Research (Burke, PI). In addition, she co-directs the Ethical and Psychosocial Implications Research component of the NEXT Medicine Clinical Sequencing Exploratory Research (CSER) project (Jarvik, PI) and serves as a co-Investigator with the Electronic Medical Records and Genomics (eMERGE) Network project at Group Health Cooperative (Jarvik/Larson, PIs).
