

Presentations at Working Group Meeting #1

To the extent they are relevant to individual talks, speakers should address these questions:

- What is the state of mHealth in use today?
- Where do you see the technology going in the years ahead?
- What ethical, legal, and policy issues are raised?
- What is the state of regulation?
(e.g., legal, market, organizational, norms, software)?
- Are there additional sources (e.g., laws, publications, experts) that we should consult?
- Are you doing research in the area that you can share with us?
- Are there specific recommendations that the Working Group should consider?
