The Office of the University Provost sponsors and oversees a wide range of information technology endeavors at the university. The Academic and Administrative Technology Committee (with representation from all academic and support units, the Office of the Vice President for Information Technology, and the constituency assemblies) advises the University Provost on information technology issues, and it plans long-term developments to maintain the university's leadership statewide in information technology.

ACADIT: Academic Information Technology and Support Services Planning Project

During the summer of 2002, AATC is working with the academic units, the Vice President for Research, the Faculty Senate and Student Government Association to develop a long-range plan for academic technology and services.
