

Welcome to the Center for Distance Education Training and Support

University of Louisville's Delphi Center Distance Education for Training and Support offers students an opportunity to take courses and programs at times and places that fit their busy lifestyles, without having to travel to class on a regular basis.

Distance Education provides learning that is independent of time and location. Rather than gathering in a classroom, students and instructors interact in several ways. All distance education courses are charged 130% of the in-state tuition rate. You will be charged 130% of the undergraduate/graduate in-state tuition rate for these courses even if you have already been billed as a full-time student. The section numbers for distance education courses are 50, 51, 52, 53, or 54.

Online Courses and Programs

UofL offers courses and complete degree programs 100% online so that students around the world can complete their bachelor's or master's degree without ever entering a classroom. Online programs at the University of Louisville are very user friendly, allowing the student to interact directly with instructors and classmates through Blackboard, the university's online delivery software.

Telecourses

Telecourses are fully accredited college-level courses brought to you by means of television.

The main difference between telecourses and on-campus courses—and what makes taking telecourses so convenient—is that the majority of your classes come to you at home via

[Kentucky Educational Television](#), or the [Kentucky Metroversity Channel](#). In addition to the video programs, the many components that make up telecourses (including textbooks, study guides, reading assignments, and instructor interaction) allow for a complete educational experience for the student. You are only required to come to campus a few times during the semester.
