PLAN PROFESSIONAL DEVELOPMENT WORKSHOPS WERE VERY EFFECTIVE. I participated starting my first year up until my dissertation and gained a lot of experience and acquired knowledge from these sessions. I will recommend that attending a number of PLAN professional development workshops be made a requirement for graduate students especially in the life sciences. Collaborations to provide specific workshops tailored for the science departments can also be considered. Thanks to PLAN workshops and academies, I am better prepared for my next career.

I didn't participate in any of the SIGS PLAN programs because I ALWAYS had scheduling conflicts with classes. I kept up with the newsletters and there was literally not a single event that I could attend because my course load and teaching assistantship responsibilities filled my schedule from 10–4 most days.

I learned a great deal of useful information from all of the over 10 SIGS events I attended during my time as a graduate student which also included the STEM mini-GTA Academy, which I marked here as the GTA Academy and am just now noticing it wasn't that one but the STEM one. I also was able to socialize with other graduate students from a range of disciplines and connect with them through these events. Thank you for offering all of these. This was one of the best parts of my graduate program here at UofL!
