

PROTECTING THE PUBLIC

A newly approved Level 3 regional biosafety lab is the latest addition to our public health armory. Researchers there will work on developing "smart" vaccines to fight bioterrorism and emerging infectious diseases, supplementing the work that other U of L scientists are already conducting in this field.

THE 'BUCKS FOR BRAINS' BOON

Since the Research Challenge Trust Fund ("Bucks for Brains") program was created in 1997, the state has matched more than \$78 million in private gifts for U of L. About two-thirds of our Bucks for Brains funding goes to medicine, science and engineering—all key areas of economic growth.

GRAWEMEYER AWARDS

Each year, the Grawemeyer foundation at U of L awards \$1 million, with the winners in each category receiving a prize of \$200,000.

Established in 1984 by the late Charles Grawemeyer, a U of L alumnus, the awards are the first major international prizes to honor powerful ideas in the arts and sciences rather than personal achievement.

A GREAT RETURN

U of L is nearing its goal of being designated a Comprehensive Cancer Center by the National Cancer Institute. This will help us bring the most innovative treatment to Kentucky's citizens, plus have an economic effect throughout the region. Studies show that for every federal research dollar invested at the university level, \$1.22 is returned to the community and state in revenue.

THE 21ST CENTURY LIBRARY

The nationally ranked UofL Libraries system reached a milestone this year when it obtained its 2 millionth volume. But it has many other reasons to celebrate, too, including a first-edition copy of Moby-Dick, the largest academic music holdings in the state, a vast collection of Edgar Rice Burroughs' work, a robotic book retrieval system and much more.

INTERNATIONAL PROMINENCE

As an example of U of L's academic excellence, consider this: Our College of Business earned three major rankings in 2005 alone. They included being named in the top 7 percent of U.S. business schools and among the top 20 entrepreneurship programs in the country, by U.S. News & World Report's "America's Best Colleges," and the fourth best MBA program in Latin America, by Latin Trade Magazine.

ENCOURAGING NEW PATENTS

U of L has one of the most generous intellectual property policies in the country, to encourage faculty to develop their ideas and discoveries into products that stimulate the economy and benefit citizens' well being. A device that helps treat glaucoma is just one of the many products growing from this relationship.
