Reason for Policy:

Workers' Compensation KRS 342.73. Provide guidance to employees that are injured or ill due to a work-related incident.

Statement:

Employees who are injured on the job and are seeking medical treatment may see the physician or provider of their choice. If the employee needs immediate medical attention, they may go to any emergency facility.

Claims should be reported to Enterprise Risk and Insurance as quickly as possible.

Workers' Compensation Insurance will begin paying compensation after the employee has been off work due to a work-related injury or illness for at least seven (7) consecutive calendar days. If the employee is off work for more than fourteen (14) consecutive calendar days, compensation is also payable for the first seven (7) calendar days of the injury. Workers' Compensation only pays lost time benefits for full days off work, at the direction (in writing) of the treating physician. The amount of pay from Workers' Compensation is two-thirds (2/3) of the employee's weekly pay. An employee may use their sick and/or vacation leave to bring the total compensation from all sources (UofL and Workers' Compensation) up to the employee's full regular pay.

Workers' Compensation does not pay for time off work for a doctor's visit, physical therapy, or medical testing.
