

Fulbright experiences enrich faculty research

Hen UofL proudly notes the talented students awarded Fulbright scholarships to study and research around the globe, people might not realize that its professors also benefit from Fulbright opportunities.

Several faculty members spent part of 2018 abroad to further their own academic endeavors—from the history of Turkish baths to the study of Renaissance-era food—through that U.S. Department of State exchange program.

Karen Kayser, the Renato LaRocca chair of oncology social work, spent four months as a Fulbright-Nehru distinguished chair at a large South India cancer-care provider, Chennai Cancer Institute. She also taught a health disparities course at Stella Maris College including videoconferencing sessions with students in the Kent School of Social Work psychosocial

oncology specialization.

"The increasing rate of cancer incidence in India and the country's limited resources in psycho-oncology have presented challenges and opportunities in addressing the psychosocial needs of persons affected by cancer," Kayser said.

scrubbing, washing and massage. Hamams now are being revived as a wellness experience for locals and tourists, said Peteet, director of Middle East and

Wendy Pfeffer, a classical and modern languages professor on her second Fulbright, spent

Islamic studies.

I hope to encourage more people to do this. A lot of scientist don't think about study abroad. It really broadens you.

Meanwhile, anthropology professor Julie Peteet spent September-June in Ankara and Istanbul as a Fulbright senior research scholar examining the archaeology, history and ethnography of the Turkish bath custom.

a half-year in Tours, France, researching Renaissance culinary history—specifically travel accounts from 16th century physician and food encyclopedia

author Jean Bruyerin-Champier.

"Thanks to the Fulbright grant, I am able to devote all my energy to my research, working in two outstanding libraries," Pfeffer said, adding that she

was submitting articles for publication and also improving her French

As they returned, A&S colleagues Rodger Payne and Gerry Williger were packing for fall Fulbright treks to Ottawa and Budapest, respectively.

Payne, a political science professor, received a Fulbright research chair in Canada-U.S.) relations at Carleton University's Norman Paterson School of International Affairs, looking at the bilateral relationships related to President Donald Trump's foreign policy.

Williger, an associate professor of physics and astronomy, will visit the Hungarian Academy of Sciences to analyze telescope data on a small solar system.

"I hope to encourage more people to do this. A lot of scientists don't think about study abroad," Williger said. "It really broadens you."

UPWARD AND ONWARD: STUDENTS EARN MORE THAN \$1 MILLION IN SCHOLARSHIPS

Asha Clark and 30 other seniors from Jefferson County Public high schools stood proudly at the annual Upward Bound Academic Banquet as their names were called and their scholarship awards were recognized. Collectively, the group received more than \$1.7 million in scholarships and other aid from various colleges and universities. Clark was one of seven students who received more than \$100,000.

"Upward Bound has been an irreplaceable experience," said Clark, a senior at Ballard High School and the mistress of ceremony at the banquet. "Without it Iwould have been completely lost

in the college application process It isn't just academics that Upward Bound has helped me with, it's the lifelong bonds that I've formed as well. I think without Upward Bound the course of my life would be completely different, and not for the better." Upward Bound, a federally

funded program that has existed on the University of Louisville's Belknap Campus for more than 50 years, serves high school students from low-income and first-generation families. The goal of the Upward Bound Program is to increase the rate at which its participants enroll in and graduate from institutions of

Bound high school seniors to receive more than \$100,000 in scholarships.

post-secondary education

The banquet celebrated 165 seniors who participated in the program and recognized more than 90 students who attained a 3.0 GPA or higher.

"The University of Louisville exists for one primary purpose students and produce a citizenry that's prepared to go forth and take their rightful place in this society." Ralph Fitzpatrick, vice president for community engagement, said during the ceremony.

and that is to educate our

Dwayne Compton, associate dean for community engagement and diversity and chief diversity officer for the School of Medicine, was the evening's guest speaker.

"I oftentimes see students and see myself when I was sitting in your seats," Compton said. "Do self-reflection, think about what it is that you want out of life and establish your own partnership of success."
