the developing brain

the literate brain

the executive brain

the imaged brain

the remembering brain

the electrophysiological brain

the acting brain

the attending brain

the hearing brain

the social and emotional brain

the speaking brain

## **PSYC 422: Intro Cognitive Neurosci**

Fall 2017 seminar to be lead by **Nick Hindy, PhD**

More synapses are in your brain than there are stars in a thousand galaxies. This seminar will introduce you to the tools and theories used to discover how constellations of neural connections produce your thoughts and sensations.
