

Parent-Child Interaction and Language Learning Laboratory

Department of Psychological & Brain Sciences, University of Louisville
&
Heuser Hearing Institute

We Need You... and Your Child

You will be paid for participation!

For more information, please contact
tel: (502) 852-6129

Email: maria.kondaurova@louisville.edu

The Parent-Child Interaction and Language Learning Laboratory is studying language development in children with hearing loss who use cochlear implants.

You and your child (3 years to 6 years old) are invited to participate in a study to help answering these questions:

- What are the characteristics of a child and a speech therapist interaction during a telemedicine session?
- Is speech therapy through telemedicine differs from an in-person therapy?
