

Knowledge in Development (KID) Lab

<http://louisvillekidstudies.org>

We value the diverse experiences and backgrounds of all students at University of Louisville and are committed to making an inclusive lab experience for all members. We encourage historically underrepresented or marginalized undergraduates to apply.

Professors: Dr. Judith Danovitch or Dr. Nicholas Noles

Type of position: volunteer for first semester, 491 or 492 credit for further semesters

Time commitment: 2 semester minimum commitment required; research interns must complete 4-7 hours per week as volunteers in their first semester and 9-10 hours per week for course credit in their second semester, must be available for lab meetings (time to be determined)

Semesters position is available: Every fall and spring semester, occasionally summer

Location of work: Davidson 302, local schools, and occasionally other sites in the community (During COVID-19 pandemic, all lab activities can be completed remotely)

Qualifications: minimum 3.0 GPA in Psychology courses, experience working with children preferred

Brief description of project: The KID lab researches how children ages 3-12 think and learn. Projects include studies of how children think about technology and the internet, how children think about social categories and relationships, and how children evaluate scientific evidence.

Specific tasks: assist in creating stimuli, testing children in the lab and at schools, entering data, and recruiting families (during COVID-19 pandemic, all lab activities, including testing children, are remote)

How to apply: Complete an RA application at <https://louisvillekidlab.wixsite.com/mysite/for-students>
