Projects in data collection stage:

- » Parental interaction styles: Impact of anxiety on children, ages 6-12 (data analyses continuing).
- » Parental anxiety and its impact on preschool children (data analyses continuing)
- » The expression of anxiety in individuals with Williams Syndrome (ongoing data collection)
- » Stress responses in anxious parents and their children (data analysis)
- » Worry and cognitive inflexibility – data collection continuing
- » Developmental psychopathology of anxiety: Longitudinal course of risk factors (ongoing data collection)
- » Anxiety in children with Dup 7 (ongoing data collection)

Projects in initial stages:

- » Information processing in anxious adults and their children
- » Naturalistic assessments of children's worry
