

Catherine M. Hammack, J.D., M.A.

Associate in Health Policy, Center for Biomedical Ethics and Society
Vanderbilt University Medical Center

[Catherine M. Hammack](#), MA, JD is a lawyer and bioethicist with over ten years of experience in empirical research and analysis regarding a variety of legal, ethical, regulatory, and policy issues, specifically those in the biomedical arena. Her work has been published in international and national peer-reviewed science journals and law reviews and has been presented to large interdisciplinary audiences throughout the country.

She joined the faculty of the Center for Biomedical Ethics and Society at Vanderbilt University Medical Center in 2017 and is an Associate in Health Policy in the Department of Health Policy. She received her Doctor of Jurisprudence at Wake Forest University School of Law and her Master of Arts degree in Bioethics at Wake Forest University's Center for Bioethics, Health, & Society in 2014.

Prior to joining Vanderbilt, she served as a project leader and analyst at the Program for Empirical Bioethics at Duke Clinical Research Institute in Durham, NC. Her interests include the legal, regulatory, and ethical issues of research involving human subjects, particularly with regard to death, dying, and the dead.
