# RRF Caging and Space Requirements Guide 

Using standards published in the Guide for the Care and Use of Laboratory Animals, 8th edition (2011) and USDA standards.

## Supermouse 750 Mouse Plastic $6.6 " \mathrm{~W}$ x 12 " $\mathrm{L} \times 5.5$ " $\mathrm{H}-79 \mathrm{IN}^{2}$

| Animal | Weight (gms.) | Number per cage |
| :---: | :---: | :---: |
| Mice | $<10$ | 13 (mother + litter) |
|  | Up to 15 | 9 |
|  | Up to 25 | 6 |
|  | $>25$ | 5 |

These are the standard units for housing mice. They are used on the Super Mouse $750^{\text {TM }}$ High Density Housing System microisolator racks. They may be used with automatic water or bottles. Use a thin layer of bedding, $1 / 4$ " to $3 / 8^{\prime \prime}$. Water port must line up to the manifold on the rack.

## One Cage 2100 Ventilated Cage $17.5^{\prime \prime} \mathrm{W} \times 12.25$ " $\mathrm{L} \times 7.63$ " $\mathrm{H}-214 \mathrm{IN}^{2}$

| Animal | Weight (gms.) | Number per cage |
| :---: | :---: | :---: |
| Rats in groups | $<100$ | 12 |
|  | Up to 200 | 9 |
|  | Up to 300 | 7 |
|  | Up to 400 | 5 |
|  | Up to 500 | 3 |
|  | $>500^{\mathrm{a}}$ | 3 |
| Single mothers w/ pups | $124 \mathrm{IN}^{2}$ req. for the group | 1 mother \& pups |

a. Larger animals may require more space to meet the performance standards published in the Guide.

These cages will normally house 2 adult rats plus 1 litter, 5 rats less than 400 grams, or 3 rats greater than 400 grams.

## Conventional Mouse Plastic 6 "W X 11 "L X 6 " $\mathrm{H}-\mathbf{6 6} \mathrm{IN}^{2}$

| Animal | Weight (gms.) | Number per cage |
| :---: | :---: | :---: |
| Mice $^{\mathrm{a}}$ | $<10$ | $11{\text { (mother }+ \text { litter }{ }^{\mathrm{b}}}^{\text {(gi }}$ |
|  | Up to 15 | 8 |
|  | Up to 25 | 4 |
|  | $>25$ | 4 |

a. Adult male mice may require single housing.
b. Use a larger cage if possible for large litters.

These cages are rarely used as most rodent housing is in individually ventilated caging (IVCs). Bedding level should be about $1 / 2$ ". These cages require more frequent cage changes than IVCs. RRF policy specifies no more than four adults in these cages.

## Sealsafe Plus (Green Line) \& ISOcage (Orange Line) Mouse Plastic

 Floor Area-78 $\mathrm{IN}^{2}$

| Animal | Weight (gms.) | Number per cage |
| :---: | :---: | :---: |
| Mice | $<10$ | 13 (mother + litter) |
|  | Up to 15 | 9 |
|  | Up to 25 | 6 |
|  | $>25$ | 5 |

Techniplast Sealsafe Plus cages are used at VA, and ISOcage cages are used at RBL. These are individually ventilated cages designed for biocontainment. Use a thin layer of bedding, $1 / 4$ " to $3 / 8$ ".

Flex-Air Plastic Mouse Cage $8.8^{\prime \prime}$ W x $13.8^{\prime \prime}$ D x $5.8^{\prime \prime} \mathrm{H}-76 \mathrm{IN}^{2}$

| Animal | Weight (gms.) | Number per cage |
| :---: | :---: | :---: |
| Mice | $<10$ | 13 (mother + litter) |
|  | Up to 15 | 9 |
|  | Up to 25 | 6 |
|  | $>25$ | 5 |

These are used in the Inhalation Barrier facility on the $7^{\text {th }}$ floor of the Medical Dental Research building.

Rat Plastic 8.5 "W X $17{ }^{\prime \prime} \mathrm{L}$ X 8 " $\mathrm{H}-\mathbf{1 4 4} \mathrm{IN}^{2}$

| Animal | Weight (gms.) | Number per cage |
| :---: | :---: | :---: |
| Rats | $<100$ | 8 |
|  | Up to 200 | 6 |
|  | Up to 300 | 4 |
|  | Up to 400 | 3 |
|  | Up to 500 | 2 |
|  | $>500^{\mathrm{a}}$ | 1 or 2 |
| Hamsters $^{\mathrm{b}}$ | $<60$ | 14 |
|  | Up to 80 | 11 |
|  | Up to 100 | 9 |
|  | $>100^{\mathrm{a}}$ | 7 |

b. Larger animals may require more space to meet the performance standards published in the Guide.
c. Use a 6 " high cage instead or a deep wire top feeder so that animals can reach the feed.

Note the automatic water port on the cage on the right. Care should be taken that this port is lined up correctly to the corresponding water valve on the shelf rack if bottles are not in use. The automatic water port may need to be blocked for breeding, as pups may escape through the port.

Techniplast Rabbit Cage $29.27 \times 28.19 \times 18.55-\mathbf{5 . 7 3} \mathrm{FT}^{2}$ each

| Animal | Weight (kgs.) | Number per cage |
| :---: | :---: | :---: |
| Rabbit | $<2$ | 3 |
|  | Up to 4 | 1 |
|  | Up to 5.4 | 1 |
|  | $>5.4^{2}$ | 1 |

a. Larger animals may require more space to meet the performance standards published in the Guide.

These modular cages are used for rabbits. Female rabbits should be housed in groups, which would require linking 2 or more racks together. Normal bedding for these units is paper, changed twice per week.

## Guinea Pig Tubs $25^{\prime \prime} \mathrm{L}$ X 25 " W X 9 " $\mathrm{H}-625 \mathrm{IN}^{2}$

| Animal | Weight (gms.) | Number per cage |
| :---: | :---: | :---: |
| Guinea Pig | $<350$ | 10 |
|  | $\geq 350$ | $6^{\mathrm{a}}$ |

a. Larger animals may require more space to meet the performance standards published in the Guide.

Used on Lenderking ${ }^{\text {TM }}$ Guinea Pig racks. Automatic water or bottles may be used.

Allentown Ventilated Rabbit/Ferret Rack-5 FT ${ }^{2}$ each cage

| Animal | Weight (kgs.) | Number per cage |
| :---: | :---: | :---: |
| Rabbit | $<2$ | 3 |
|  | Up to 4 | 1 |
|  | Up to 5.4 | 1 |
| Ferret $^{\text {b }}$ | $>5.4^{\text {a }}$ | 1 |
|  | Up to $.6(600 \mathrm{~g})$ | 4 |
|  | Up to $.8(800 \mathrm{~g})$ | 3 |
|  | $>.8(800 \mathrm{~g})$ | 1 |
|  | Adult Male $^{\mathrm{c}}$ | Do Not Use |

a. Larger animals may require more space to meet the performance standards published in the Guide.
b. Per the UK "Code of Practice". NIH does not specify minimum cage size for ferrets.
c. See Table 4.

RRC Large Animal Runs 4'W X 6' L-24 $\mathrm{FT}^{2}$ each section

See the Guide to insure compliance with the Animal Welfare Act. Recommended floor space requirements from the Guide are found in Table 2 and Table 3. The space requirements listed in the $\boldsymbol{A} \boldsymbol{W} \boldsymbol{A}$ supercede the Guide and are based on size, not weight.

To insure compliance with the law at our facility, Dogs require twice the space recommended by the $\boldsymbol{A} \boldsymbol{W A}$ (length from nose to tip of tail +6 " squared rule) or daily exercise.

## CII Large Animal Runs

CII Room 6-168.3 sq. ft. all pens opened together

CII Room 8 - 132 sq. ft. all pens opened together

| Species | Req. Space | $\begin{gathered} \text { Req. Space } \\ \text { (group housed) } \end{gathered}$ | \# per pen (single housed) | $\begin{gathered} \text { \# per pen } \\ \text { (group housed 2-5) } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |
| Sheep $<25 \mathrm{~kg}$ | 10 ft 2 | 8.5 ft 2 ea . | 4 | 4-5 |
| Sheep 25 to 50 kg | 15 ft 2 | 12.5 ft 2 ea . | 2-3 | 3 |
| Sheep $>50 \mathrm{~kg}$ | 20 ft 2 | 17 ft 2 ea. | 2 | 2 |
| Swine $<15 \mathrm{~kg}$ | 8 ft 2 | NA | 5 | NA |
| Swine 15 to 25 kg | 12 ft 2 | 6 ft 2 ea . | 3 | 6-7 |
| Swine $>25$ to 50 kg | 15 ft 2 | 10 ft 2 ea . | 2 | 4 |
| Swine $>50$ to 100 kg | 24 ft 2 | 20 ft 2 ea. | 1 | 2 |
| Swine $>100$ to 200kg | 48 ft 2 | 40 ft 2 ea . | 2 pens | 1 |
| Cattle $<75 \mathrm{~kg}$ | 24 ft 2 | 20 ft 2 ea . | 1 | 2 |
| Cattle 75 to 200 kg | 48 ft 2 | 40 ft 2 ea. | 2 pens | 1 |

Table 1
Recommended Space for Commonly Used Group-Housed Laboratory Rodents
(From the Guide for the Care and Use of Laboratory Animals, 2011 edition)

| Animals | Weight (gms.) | Floor Area/Animal (in. ${ }^{\text {a }}$ ) | Height (in.) |
| :---: | :---: | :---: | :---: |
| Mice | $<10$ | 6 | 5 |
|  | Up to 15 | 8 | 5 |
|  | Up to 25 | 12 | 5 |
|  | $>25$ | At least $15^{\text {a }}$ | 5 |
|  | Mother + litter | At least 51 | 5 |
| Rats | $<100$ | 17 | 7 |
|  | Up to 200 | 23 | 7 |
|  | Up to 300 | 29 | 7 |
|  | Up to 400 | 40 | 7 |
|  | Up to 500 | 60 | 7 |
|  | $>500$ | At least $70^{\mathrm{a}}$ | 7 |
| Hamsters | Mother + litter | At least 124 | 7 |
|  | $<60$ | 10 | 6 |
|  | Up to 80 | 13 | 6 |
|  | Up to 100 | 16 | 6 |
| Guinea Pigs | $>100$ | At least $19^{\text {a }}$ | 6 |
|  | $<350$ | 60 | 7 |
|  | $>350$ | At least $101^{\text {a }}$ | 7 |

a. Larger animals may require more space to meet the performance standards published in the Guide.

## Table 2

## Recommended Space for Rabbits, Cats, and Dogs

(From the Guide for the Care and Use of Laboratory Animals, 2011 edition)

| Animal | Weight (kg.) | Floor Area/Animal (ft. ${ }^{\text {a }}$ ) | Height (in.) |
| :---: | :---: | :---: | :---: |
| Rabbits | $<2$ | 1.5 | 16 |
|  | Up to 4 | 3 | 16 |
|  | Up to 5.4 | 4 | 16 |
|  | $>5.4$ | At least $5^{\text {a }}$ | 16 |
| Cats | Up to 4 | 3 | 24 |
|  | $>4$ | At least 4 | 24 |
| Dogs $^{\text {a }}$ | $<15$ | 8 | - |
|  | Up to 30 | 12 | - |
|  | $>30$ | At least $24^{\text {a }}$ | - |

a. Larger animals may require more space to meet the performance standards published in the Guide.
b. See the Guide to insure compliance with the Animal Welfare Act, and the "length +6 inches squared" rule. Height must be sufficient for the animal to comfortably stand erect with feet on the floor.

Table 3
Recommended Floor Space for Commonly Used Farm Animals
(From the Guide for the Care and Use of Laboratory Animals, 2011 edition)

| Animal | Weight (kg.) | ${\text { Floor Area/Animal (ft. }{ }^{\mathbf{2}}}^{\mathbf{b}}$ |
| :---: | :---: | :---: |
| Sheep \& Goats | $<25$ | 10 |
|  | Up to 50 | 15 |
|  | $>50^{\mathrm{a}}$ | 20 |
| Swine | $<15$ | 8 |
|  | Up to 25 | 12 |
|  | Up to 50 | 15 |
|  | Up to 100 | 24 |
|  | Up to 200 | 48 |
| Cattle | $>200^{\text {a }}$ | At least 60 |
|  | $<75$ | 24 |
|  | Up to 200 | 48 |
| Ponies | Up to 350 | 72 |
|  | - | 72 |
|  |  |  |
|  |  |  |

a. Larger animals may require more space to meet the performance standards published in the Guide.
b. Group housed animals require less space per animal than listed here. See the Guide for details.

Table 4
Minimum Requirements For Housing Ferrets In Breeding And Post Weaned Stock (From the Code of Practice for the Housing and Care of Animals, UK)
$\left.\begin{array}{|l|c|c|}\hline \begin{array}{l}\text { Breeders } \\ \text { Jill + Litter }\end{array} & \begin{array}{c}\text { Minimum Floor } \\ \left.\text { Area (cm }{ }^{2}\right)\end{array} & \begin{array}{c}\text { Minimum } \\ \text { Height (cm) }\end{array} \\ \hline \begin{array}{l}\text { Group Housing } \\ \text { up to } 600 \mathrm{~g}\end{array} & 5400 & 50 \\ \text { up to } 800 \mathrm{~g} \\ \text { over } 800 \mathrm{~g}\end{array}\right)$
(Note - the minimum floor area for animals housed in groups must not be less than that specified for an animal housed singly.)
