

# STATISTICAL CONSULTING CENTER

## *Aiding research through statistical understanding.*

The Statistical Consulting Center (StCC) is a unit of the Department of Bioinformatics and Biostatistics of the School of Public Health and Information Sciences. Consulting is available to health researchers at the University of Louisville and to members of the community.

*“ Scientific review committees will not approve a proposal without a fully formed research question and a clearly stated outcome measure. ”*

Fees are determined based on the level of assistance provided by the StCC and the affiliation of the client.

**Quick Help**—Minimal assistance is available for free through the walk-in clinic or by appointment.

**Consulting**—Longer projects are fee-for-service & billed hourly.

**Collaborations**—Grant writing is free, in exchange for percent effort ( $\geq 10\%$ ). The initial consultation is free. Co-authorship is requested for substantial contributions to published papers.

- Study Design & Development
