Crime Prevention Through Environmental Design

32-Hour Training Course - 3.0 CEUs (KLEC Approved)

Tuition: \$595⁰⁰ if paid by cash/check / \$615⁰⁰ if paid by Visa or Mastercard

Course Description

What is Crime Prevention through Environmental Design or CPTED? Put simply, it is a way to design out crime.

CPTED is based on the concept that proper design and effective use of the built environment can lead to a reduction in both the incidence and fear of crime while also improving quality of life.

Strategies implemented from this multi-discipline approach have been adopted by numerous national and international professional organizations. Now is the time for crime prevention practitioners, law enforcement officers, community planners, landscape architects, city officials, educators and other key professionals involved in facility planning, design, development, business owners and managers, educators and individual home owners to learn how to effectively utilize CPTED strategies to prevent crime in their businesses, schools, neighborhoods and overall communities in a way that is safe, attractive and cost-effective!

Participants will learn how the design and use of spaces influences behavior as well as participate in a practical exercise involving a site visit and earn a Basic CPTED certificate!

Who Should Attend

Law enforcement and public safety personnel (patrol officers, neighborhood and district resource officers, crime prevention officers), security and safety personnel, municipal leaders and employees (planning and zoning, code enforcement personnel, permits, inspections and licensing officers), business owners, building and apartment managers, architects and planners, community and neighborhood association members

Course Topics and Areas of Instruction

- CPTED concepts and principals
- Behavior and the physical (built) environment
- Vehicular and pedestrian traffic issues as it relates to access and safety
- CPTED as a means of economic revitalization
- Planning process including land use, zoning, codes and ordinances
- CPTED assessments and plan review
- Data collection, analysis, presentations and reports
- Practical exercise involving site visits
- Discussion of participant issues or local problem

Dates

November 16-19, 2020

Hosted by
