

## **FACULTY SENATE REPORT TO STAFF SENATE 12/2021**

The University of Louisville Faculty Senate met on December 1, 2021. The meeting was called to order by chairman David Schultz at 3:00 PM.

There was only one action item. The senate voted to approve a new program in the College of Business: the MS in Accountancy and Analytics. It replaces the current Master of Accountancy (MAC) degree program. The program aligns with the needs for accounting and business analytics talent in the region. Requires 34 hours (three semesters) to complete. It meets the acute need for skilled professionals in of managerial analytics. This program combines that need for accounting talent and analytics knowledge.

There were other standing committee reports but no other discussion items.

Respectfully Submitted,

Timothy Roberts
