

Staff Senate Services and Facilities Committee

Meeting: Wednesday March 1, 2023 @ 1pm

Attendance: Mark Woolwine, Dennis Thomas, William Tuttle, Angela Lewis-Klein, Jason Sievers.

S&F met Wednesday March 1, 2023. There was no new business brought before the committee. Dennis did report back that the School of Nursing cockroach problem had been followed up with from Physical Plant and Black Diamond. Apparently, some of the issue was with vacant portion of the building. Water had been drained from the pipes and they believe that was letting the roaches in. The P-traps were filled back with water. The space is also going to be cleaned up. Black Diamond is also going to perform periodic inspections and spray.

Last year, the committee started reviewing the Committee charter that was being developed before COVID-19. We received a copy of the charter from a previous committee member and will review the document and discuss it at our next meeting.
