ITS will be turning on UL2FCTR (Duo) authentication in the Peoplesoft Student System (on ULink) the first weekend of spring break, March 8-10.

UL2FCTR or two-factor authentication adds a second layer of security to online accounts by requiring a second piece of information before you can login. Verifying the individual's identity using a second factor (a verification code created for you and sent to/by another device) improves privacy and security.

Implementation of UL2FCTR / Duo is a federal requirement for the Gramm-Leach-Biley Act (GLBA) and a mandatory condition for UofL's cybersecurity insurance coverage.

UofL Two-Factor Authentication
(A DUO Product)

https://louisville.edu/its/ul2fctr/

Enrollment OPEN

Students must first enroll to create an account and set their preferences in order to use UL2FCTR (Duo) when required. Users can download the free mobile app, set up a text confirmation or provide your phone number for call confirmation.
