Web Compliance Workgroup

Charge

The Web Compliance workgroup is charged with submitting recommendations for the specific requirements involved with creating and distributing information in a shared technical environment that is accessible to all users and that meets all legal and privacy standards.

These recommendations may include processes, tools, workflows and resources to ensure compliance across our web system.

Rationale for Discussion and Research

As a public university receiving federal funding we are required to, and as a Community of Care we are called to make accommodations to ensure our web content is accessible to everyone. At present, our technology solutions do not provide us with the processes, protections or methods to ensure that the content on our websites is accessible to all.

The web compliance workgroup is tasked with discussing what changes are needed to provide a digital experience that is accessible for our users.

Membership

Membership is considered active until commencement of Phase I and II of the web improvement project have been completed. After the discovery phase, meetings will be scheduled ad hoc.

Membership positions may be considered vacant if:

- The member fails to attend more than two meetings without prior notification of workgroup chair
- The member resigns from the workgroup via written notification to the workgroup chair

Reporting and Communication

Discovery Phase

Workgroup chair(s) will provide a report of their findings after a minimum of 2 meetings with their workgroups once both co-chairs agree they have sufficiently answered all of the requirements of the workgroup charge

Implementation Phase

Workgroups will agree to meet as needed throughout development to test and provide feedback on solutions proposed and implemented from their recommendations.
